Future of Energy Seminar is back

ENLENS

SEP 1 · 2023

READ IN APP ↗

The close interaction between the Future of Energy (FoE) seminar series (since 2019) and a new interfaculty research priority area (RPA) of the University of Amsterdam, ENLENS (Energy Transition through the Lens of Sustainable Development Goals; since 2022), has delivered new insights and discussions on how the European energy transition can have impacts across the entire world and is strongly intertwined with essentially all Sustainable Development Goals. The FoE seminars and ENLENS jointly generate key findings that can help us answering the multiple challenges of the energy transition and building a sustainable future together.

The programme of each seminar consists of two presentations on the energy transition, coming from different academic fields, followed by general discussions that are relevant for the University of Amsterdam Future of Energy network.

Now, the Future of Energy is back – for those who are newly interested and those who have been eagerly awaiting its return.

The next Future of Energy Seminar is scheduled for Monday, 11 September 2023, from 12:00 to 14:00 (including a light lunch), at the Institute for Advanced Study (IAS - UvA) – for on-site attendees only.

Presentations:

Title: “Large-Area Solar Power Enabled by Perovskites”

Presenter: Bruno Ehrler

Title: “Leaving Fossil Fuels Underground for Climate Change Control”

Presenter: Joyeeta Gupta

To participate, **please RSVP by 7 September** by clicking on the button below:

ENLENS CALL FOR PROJECT PROPOSALS 2023

The new research priority area 'Energy transition through the lens of Sustainable Development Goals' (ENLENS) announces its third call for project proposals. ENLENS unites researchers working on economic, environmental, technological, social, political, and business aspects of the energy system, the energy transition, and Sustainable Development Goals.

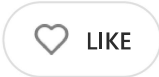

The application deadline is 1 October. Through this call, ENLENS will provide seed money for cross-faculty initiatives to generate new opportunities for researchers to apply their expertise in an interdisciplinary approach, and develop joint proposals for external research funding. For more information, access the ENLENS website in the button below:
